CMS, earning potentially thousands of dollars in incentives which could easily offset the cost of the EMR.

Ability to automatically submit data to CMS saves practices enormous amount of time trying to file for PQRS incentives.

PQRS is part and parcel of achieving meaningful use and will be one of the mandatory features that EHR's vendors will need to provide for stage 2 and stage 3 meaningful use criterias. Dexter Solutions is way ahead of all other leading EHR system like NextGen, Athena and AllScripts who have failed to obtain certification this year.
