

Manage your transcriptions in the most easy and efficient manner all from within your EMR. Some of the salient features are

- eZDocs™ lets you record and attach your dictations to the encounter at the point of care.
- Your transcriptionist has access to all dictations from within eZDocs™.
- Transcriptionist captures and enters all discrete data like Blood pressure and vitals etc in the EMR.
- An approval process is then executed and upon approval the transcriptions are stored as a part of the note in eZDocs™ EMR

eZTranscription™ module lets you easily track the status of your transcriptions, send the transcriptions back for corrections and communicate with your transcriptionist in an easy and efficient manners.

Dexter Solutions also offers affordable transcription services to all our customer.
